

Changes to Lunula

11/13/2025

Current Lunula	Updated Lunula
<i>The images below are for representation purposes only</i>	
  	  
Changes Below: Touchscreen: the touchscreen changed from Automation Direct EA9-T6CL to Automation Direct CM5-T7W, an electromechanical drop-in per the manufacturer. Software Screen Images: the software screen images changed to implement Erchonia's new logo and give the software a more up-to-date/refreshed appearance. Power Indication LED: the device's power indication LEDs were removed, now being replaced by the new touchscreens power indication LED. Base Plate & Base Plate Feet: the device baseplate is being reduced in thickness to reduce the device weight by approx. 2kg, with the base plate feet changing to maintain the current device height Decorative Logo's & Overlays: the decorative touchscreen overlay & base plate overlay changed to implement Erchonia's new logo and give the device a more up-to-date/refreshed appearance. A new decorative overlay was added next to the key switch to give the device a more up-to-date/refreshed appearance. The enclosure front & back overlay was removed to give the device a more up-to-date/refreshed appearance. External Metal Parts: the base plate, door and handle color changed to dark metallic grey to give the device a more up-to-date/refreshed appearance.
